## CONNECTION ILLUSTRATION

## OPERATION

This switch box is designed for 2 operational modes, you can use manual application or Remote control application .

### Connection

#### Step 1.

Connect the supplied cables from the HDTV HDMI sources into the 2\*1 HDMI Switcher

#### Step 2:

Connect the cables from your display (monitor or projector) into the HDMI out of the 2\*1 HDMI Switcher.

**Step 3:** Plug the 5VDC power supply into the 2\*1 HDMI Switcher.

### Operations

#### Remote operation

Use the HDMI-210R IR remote power on this box, the "power" LED on the front panel will light on, in this case, use number button to toggle between sources.

Or you can use the forward and back button to control input sources

#### Mechanical Operation

This switch box can be use manually; the "SELECT" key is used for mechanical switch. If you want to change the input channel, you can only press the button once. There will be a LED indication for what channel it is. Select button is power button too. When you press select button for 2 seconds power will turn off, press it again for another 2 seconds will turn on

The procedure is a cyclic function

When you selected the channel, there will a LED on to present the channel. If you select channel 1, the CH1 LED will light on
